

# Words and photos from a satisfied Powerjection III customer.

The following an unsolicited letter from a customer who bought and installed the new Powerjection III EFI system on his 1931 Model A powered by a 409 Chevy:

Dear Ken:

I purchased your Powerjection III system for my 1931 Ford model A Coupe powered by a Chevy 409, I just like to say that it woke that 409 up, not that it did not have power before with a carburetor, but with the P3 the difference is day and night. I'm very happy with it; the throttle response and power as well as the fuel economy surpassed all expectations.

I'm very impressed with the quality of the unit, the manual was very clear easy to understand even for someone like me who has little knowledge of fuel injection. The installation was very simple just as advertised. Having such a positive experience with the P3 I'm looking forward to my next purchase of your products.

Thank you,  
Robert Steinberg - Menifee, CA
